

Elisangela Pethke

Mid-Level Frontend Engineer · React · TypeScript · JavaScript

Berlin, Germany · +49 176 61610407
elisapethke@gmail.com · LinkedIn · Portfolio · GitHub

Frontend Engineer with end-to-end ownership of production applications serving 10,000+ users. Specialized in **React, TypeScript, and component architecture** — with proven ability to take products from zero to deployment independently. Track record of building scalable UI systems, leading API integrations, and driving performance improvements. Strong product instinct: delivers clean, maintainable code that creates real user impact. Currently growing toward Tech Lead responsibilities.

JWT Auth

Context API

React Hooks

CI/CD

Responsive Design

- Conceived, architected, and shipped a fullstack personal finance management app from zero to production — sole engineer across frontend, backend integration, UX, and deployment.
- Built with **React + TypeScript** on the frontend, integrating **Node.js, Firebase, and REST APIs** with JWT authentication — demonstrating fullstack capability across the entire stack.
- Designed the full UX: information architecture, user flows, and responsive interface — balancing simplicity with financial clarity and strong WCAG accessibility standards.
- Owned product strategy end-to-end: defined feature roadmap, prioritised user engagement flows, and managed the full delivery lifecycle (planning → QA → production).
- Implemented scalable component architecture and performance best practices, resulting in fast load times and a maintainable codebase ready for growth.
- Sole decision-maker on stack selection, architecture patterns, and UX direction — acting simultaneously as Product Manager and Tech Lead.

Stack:	React · TypeScript · Node.js · Firebase · REST API · JWT · Context API · CI/CD
Role:	Fullstack Engineer · Product Lead · Tech Lead
Scope:	Zero → Production · Strategy · UX · Architecture · Frontend · Backend Integration · Deployment

PROFESSIONAL EXPERIENCE

Frontend Engineer

Aug 2024 – Present

NevTec · Remote

- Delivered production frontend features end-to-end using **React and TypeScript**, owning task scope, technical decisions, and release quality.
- Designed and built a **reusable component library** that reduced UI development time across the team and enforced consistency at scale.
- Led API integration for key product flows — modelled data contracts with backend developers and handled edge cases and async error states.
- Drove performance improvements through **code-splitting, memoisation, and rendering optimisation**, resulting in measurably faster load times on critical pages.
- Contributed to architectural decisions in sprint planning, influencing technical direction beyond individual task execution.
- Conducted code reviews focused on maintainability and scalability; mentored junior contributors during onboarding.

SELECTED PROJECTS — SOLE ENGINEER, PRODUCTION-READY

English with Carol Maria

acarolmaria.com

Sole Frontend Engineer · Education Platform · 10,000+ Active Users

- Architected a scalable React component system for an education platform that grew to **10,000+ active users** — designed for performance and long-term maintainability.
- Owned all UX decisions: content hierarchy, responsive behaviour, and user flows — translated educator requirements into intuitive interfaces.
- Optimised rendering and asset loading to ensure a smooth, fast experience at scale without a dedicated backend or DevOps team.

Arco Psicoterapia

arcopsicoterapia.com

Sole Frontend Engineer · Institutional Website

- Delivered a fully accessible, production-ready institutional site — responsible for design system, responsiveness, and deployment pipeline.
- Applied semantic HTML and **WCAG accessibility guidelines**, translating brand identity into a polished, professional UI.

Elaine Teixeira

elaineteixeira.com

Sole Frontend Engineer · Personal Branding Website

- Built and delivered a complete personal branding website — responsible for layout, visual identity, and responsive implementation.
- Structured for easy content updates, ensuring long-term usability for the client post-delivery.

Personal Portfolio

elisbethke.com

Sole Frontend Engineer · Portfolio Site

- Designed and built a personal portfolio showcasing all production projects — demonstrates frontend skills, visual design sense, and end-to-end delivery capability.

TECHNICAL SKILLS

Frontend Core	React, TypeScript, JavaScript (ES6+), React Hooks, Context API, Redux basics
UI & Styling	HTML5, CSS3, Responsive Design, Component-Based Architecture, WCAG Accessibility
State & Data	REST API Integration, JSON, JWT Authentication, Firebase, Async/Await, Error Handling
Backend & Fullstack	Node.js integration, Firebase (Auth, Firestore, Hosting), API contract design
Tooling & DevOps	Git, GitHub, GitLab, VS Code, CI/CD basics, Performance Optimisation, Code Splitting
Methods	Agile / Scrum, Clean Code, SOLID, MVC / MVVM, Code Review, Technical Mentoring

EDUCATION & TRAINING

Udacity — iOS Developer Nanodegree
Alura — React & React Native for Web and Mobile
Udemy — Web & Mobile Development Bootcamps

LANGUAGES

Portuguese — Native
English — Professional Working Proficiency
German — Fluent (B2/C1)
